

Smart Storage Evaluation Disks and Marketing Materials Order Form

Smart Storage now offers program evaluation disks to help you sell SMARTCD Archive, SMARTCD Library and SMARTWRITE CD software. Each disk runs for thirty minute intervals. Your sales staff can use the evaluation disks for demonstration purposes, and prospective customers will be able to "test-drive" Smart Storage software. Each demonstration disk comes with full documentation. The programs can be copied and distributed freely.

Also available: **Technical specification sheets** and **product guides**. Spec sheets are 2-color, double-sided on glossy stock. The Implementation and Marketing Guides explain important benefits and features of the software, as well as software requirements. There is a minimum order of 100 spec sheets and \$5.00 S/H per literature order. International orders, see note below.

Product	Price in US Dollars	Quantity	Extended price
